

DARTNet Practice Performance Registry: Metric Development List

Updated 1/24/2017

The DARTNet Registry Metric list is always evolving as we are consistently adding new specialties to the Registry as well as adding new metrics within specialty groupings. This document outlines our Metric Development Roadmap and provides basic details on the metrics that are in development currently.

The DARTNet Institute welcomes metric enhancement suggestions regarding measures that would assist their practices with quality improvement. If your specialty is not represented on this list you can still join the Registry and attestation for MU Stage 3 and MIPS. With careful consideration, DARTNet may add metrics for your specialty to the development list.

*****DARTNet is currently revising our Metric Development roll out plan and will post once the schedule is confirmed. Thank you for your patience while we improve our Registry*****

DARTNet Practice Performance Registry Metric Guide

Specialty	(Est.) Avail Quarter	Metric Content
Primary Care (FM/IM)	2015 Q4	Preventive Screenings; Chronic Disease Mgmt and Screening (DM, HTN, ASCVD, Obesity, Depression, Hyperlipidemia, Asthma)
