

DARTNet Practice Performance Registry: Metric Development List

Updated 4/25/2018

The DARTNet Registry Metric list is always evolving as we are consistently adding new specialties to the Registry as well as adding new metrics within specialty groupings. This document outlines our Metric Development Roadmap and provides basic details on the metrics that are in development currently.

DARTNet amended the Performance Registry Metric Development Plan in September 2017 in an effort to get meaningful metrics into the hands of all providers and specialties accessing the Registry. To do this, each specialty will have 2-4 Quality metrics developed according to the timeline below. Once each represented specialty has a base of 2-4 metrics, DARTNet will return and add additional metrics to specialties.

The DARTNet Institute welcomes metric enhancement suggestions regarding measures that would assist their practices with quality improvement. If your specialty is not represented on this list you can still join the Registry and attest for MU Stage 3 and MIPS. With careful consideration, DARTNet may add metrics for your specialty to the development list.

Please contact DIRegistry@dartnet.info with any questions or comments.

NOTE: Metrics will be available by the end of the listed Quarter.

DARTNet Practice Performance Registry Metric Guide

Specialty / Category	Est. Avail Quarter	Metric Content
Preventive Services	1-Available	Preventive Care Screenings**; Chronic Disease Screenings (DM, HTN, ASCVD, Obesity, Depression, Hyperlipidemia, Asthma)
